## **Regulations Related to Trash Collection**

- Containers must be at the curb by 7 a.m. on the scheduled collection day.
- Be aware of holidays that may affect garbage collection.
- Container handles must be turned away from the street. The container should be placed at the street with the handles closest to the house.
- The preferred location for your container is at the end of your driveway on the side that is free of mailboxes, power poles, trees, and parked cars. There should be at least five feet of clearance on both sides, back and top of the container. Handles should be away from the street.
- All garbage in the containers must be bagged.
- We ask that you refrain from parking along the streets on collection day where access to a
  container may be blocked. Generally, 15 feet of clearance from isolated vehicles is adequate.
  Keep the refuse containers away from cars, boats, and trailers to avoid risk of damage.
  Remember, however, do not block access to your mailbox.
- Containers must be removed from the curb by 7 a.m. the day after collection.
- All household trash and a limited amount of bagged yard waste may be placed in the container.
  The lid may be open on the container but please bag what is exposed to prevent spillage. Do not
  place boxes in the container as they may block the access for the garbage to come out. Use
  plastic bags for loose, wet garbage and occasionally hose out your container. Remember to
  crush materials to save space.
- National surveys indicate that the 96-gallon container you receive is adequate for the average home. Each container will hold the equivalent of three normal trash cans. However, if you find the need for an additional container, one can be purchased from local businesses, which will be your property. When you move, you can take the second trash container with you. (Currently, due to budget constraints, we are unable to sell any containers. We will update the website when we are able to sell containers again.)
