Spill Response Training for Emergency Responders

Emergency responders shall receive training in spill response, as part of their training in hazardous materials (HAZMAT). This training will be provided by Fire and Rescue, with written documentation provided to the Department of Community Development. Documentation shall include date of training, individuals receiving training, and a copy of the training syllabus that identifies spill response as a topic.

Re: Required Stormwater-related Training to Comply with Roanoke County's
Municipal Separate Storm Sewer System (MS4) Permit Requirements

Roanoke County holds a MS4 Permit, issued by the Virginia Department of Environmental Quality (DEQ), which regulates the discharge of stormwater into the County's storm drainage system. The Department of Community Development is tasked with the responsibility of coordinating the County's permit compliance activities, but there are some permit requirements that impact other County departments, such as employee training.

The MS4 permit requires biennial training for particular County employees. From a review of job classes in your department, some employees will need to take one or more of the three required classes, as listed below. **Note that these classes are now available on the County's CAFÉ Intranet site under the Stormwater tab, located here:**

<http://cafe.co.roanoke.va.us/Stormwater/SitePages/StormwaterTraining.aspx>

Stormwater Training – Current Classes

Recognition and Reporting Illicit Discharges

Applicable field personnel shall receive training in the recognition and reporting of illicit discharges. **This training video will take approximately 30 minutes.**

Good Housekeeping and Pollution Prevention Practices

Employees that perform road, street, and parking lot maintenance, or are employed in and around maintenance and public works facilities and at recreational facilities shall receive

training in good housekeeping and pollution prevention practices. **This training video will take approximately 1 hour.**

NOTE: All employees who are required to take *Good Housekeeping and Pollution Prevention Practices* should also read and follow the County's Standard Operating Procedures (SOPs). These procedures have been designed to eliminate or minimize pollutant discharges in stormwater, and they are also located on the CAFÉ Intranet's stormwater site. Should there be a need to add additional SOPs to cover your department's various activities, please let us know; we will be happy to assist your staff in preparing tailored SOPs, as necessary.

Contractor Oversight for Environmental Compliance

Supervisors who oversee Contractors that perform work for the County or employees involved in developing contracts for Contractors shall take this training. The training will explain that all Contractors must have their own written good housekeeping and pollution prevention program, or they must comply with the County's written policies and SOPs. County employees who oversee Contractors working for the County must ensure compliance by Contractors. **This training video will take approximately 30 minutes.**

An Excel Spreadsheet tailored for your department is included with this memo. Please use it to track which employees have taken the necessary training. The spreadsheet lists each Job Class title that must take the classes described above. As the Department Head, you or your designee shall be responsible for ensuring all personnel in the listed positions complete the training on or before June 30, 2015 and document the following information on the spreadsheet under each course title:

- Employee Name
- Employee Number
- Date of Training

Please return your completed spreadsheet to: Cindy Linkenhoker, Stormwater Program Manager, Dept. of Community Development, by July 1, 2015. Also, feel free to add in new positions on the spreadsheet or delete those that no longer exist in your department.

Training may be done online by each individual that requires training, or you may train employees en masse by showing the videos at a staff meeting or other gathering. We are also available to train your staff in person, if desired.

Additional topics will soon be added under the *Good Housekeeping and Pollution Prevention Practices* heading to include "Stormwater Pollution Prevention Plans (SWPPPs)" and "Spill Prevention, Control, and Countermeasure (SPCC) Plans." We will notify you when this material has been posted to the CAFÉ stormwater site.

Thank you in advance for your support. Please contact me at 540.772.2096, ext. 245 if you have any questions.

Re: Request for Departmental Support to comply with Roanoke County's Municipal Separate Storm Sewer System (MS4) Permit Requirements

Roanoke County holds a MS4 Permit, issued by the Virginia Department of Environmental Quality (DEQ), which regulates the discharge of stormwater into the County's storm drainage system. The Department of Community Development is tasked with the responsibility of coordinating the County's permit compliance activities, but there are some permit requirements that impact other County departments, such as employee training.

The MS4 permit requires biennial training for particular County employees. We have identified eleven departments (11) that have certain job classes that must take one or more of the three required classes. And as presented at this week's E-Team meeting, the classes are now available on the County's CAFÉ Intranet site at: <http://cafe.co.roanoke.va.us/Stormwater/SitePages/StormwaterTraining.aspx>.

The following departments have staff who must take one or more of the three classes:

- | | |
|-----------------------------------|--|
| 1) Commissioner of the Revenue | 7) Police Department |
| 2) Community Development | 8) Regional Center for Animal Control & Protection (RCACP) |
| 3) Parks, Recreation, and Tourism | 9) Real Estate Valuation |
| 4) Finance | 10) Sheriff's Department |
| 5) Fire Department | 11) Social Services |
| 6) General Services | |

We have sent a personalized memo to each department head of the above-named departments, providing the training requirements, a summary of the available classes, and a spreadsheet listing the job classes and the courses each employee in those job classes must take. A copy of the generic memo is attached for your reference. Please call me at 540.772.2096 (ext. 245) if you have any questions.
